-  Weed Science
-  Plant Science

Make a difference—become a Doctor of Plant Health

Numerous employment opportunities exist for professionals with interest and experience in comprehensively managing plant production systems.

The Doctor of Plant Health program at the University of Nebraska–Lincoln educates plant doctors to develop and implement plant management systems that maximize economic, environmental and social sustainability.

- An interdisciplinary, system-based curriculum
- Practical internship experiences
- Comprehensive diagnostic training
- Leadership and professional skills development
- Flexibility to shape the program to meet your career goals
- Numerous support opportunities available
